

What is claimed is:

1. A training halter for a dog, comprising:
an upper nose loop for applying pressure to the dog's nose;
a lower nose loop connected to said upper nose loop;
a collar member for encircling the dog's head; and
5 a pair of side members for securing the collar member to the upper and lower nose loops.
2. The training halter of claim 1, wherein said upper nose loop is made of a soft cotton/nylon braid.
3. The training halter of claim 2, wherein said upper nose loop is cylindrical.
4. The training halter of claim 1, wherein said lower nose loop and said side members are made of a flat braid nylon weave.
5. The training halter of claim 1, further comprising an under chin strap connected to said upper and lower nose loops at one end thereof and at an opposite end to said collar member.
